ABOUT NSS

Ningbo Zhong Lian Steel Structure Co., Ltd. (NSS) was founded by an experienced management group and an outstanding skilled labor team from the United States, China, Canada, Australia and the United Kingdom. NSS offers a unique opportunity for our global clientele in the procurement of high-specification, quality-assured and economically-sourced structural and mechanical steelwork with other associated materials which form package-supply to clients as required.

Our business focus is on the fabrication of structural and miscellaneous steelwork utilized for Power, Mining, Marine, Industrial and Amusement Ride projects worldwide.

The NSS facility has a fully covered and enclosed workspace area of 33,000 m² with a dedicated work area of over 3,000 m² for shotblasting and painting to clients' specifications. The facilities are equipped with advanced Flux Core and Sub-merged ARC welding equipment along with automated (CNC) and semi-automated machinery which fabricates both local raw materials and international steel profiles of quality-assured steel grades and specifications.

Our Quality Assurance program focus is on being in compliance to most international standards to ensure that we meet our clients' Project Specifications to comply with their location and industry standards.

The facility is located at the international port facility in Beilun, Ningbo, China and is supported by all major logistic freight firms ensuring prompt shipping to all ports throughout the world. The port facilities in addition to handling containerized shipping can handle break bulk cargo and modularized vessel shipments.

The Company holds certification by AISC/AWS/CWB and ISO9001. All welders and inspectors have CWI, AWS and GB certifications. Painters and inspectors hold NACE certifications.

ENGINEERING AND TECHNICAL SUPPORT

3D modeling using Tekla Structures and Solid Works.

3D modeling and export for BIM model review and Site Installation Improvement.

Creation of shop and field drawings in compliance to AISC standards.

Coordination and recommendation of availability and utilization of domestic steel.

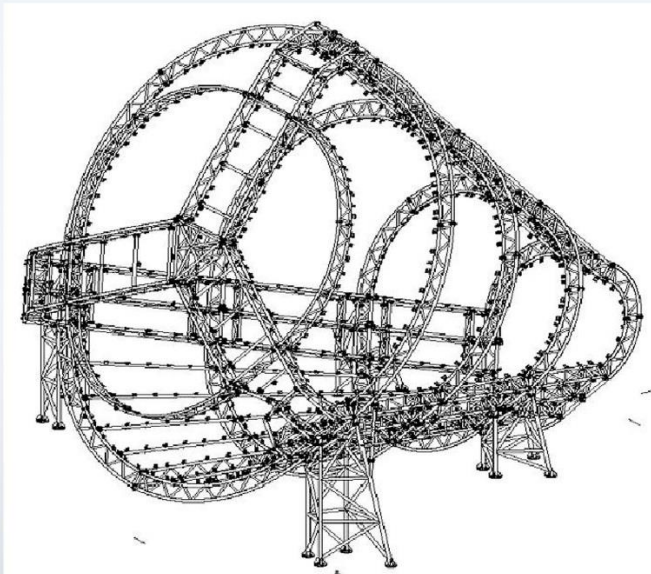

Exporting of CNC file from Tekla Structures for numerical control process.

Strict controls of drawing acceptance and releasing.

Utilization of Fabtrol (MRP system) for material and steel components from start to finish.

We utilize Kingdee (ERP) for financial and other materials management.

3D Model creation of full structure

NSS Abyss structure installed on site

SAFETY

We believe safety is our priority responsibility, we frequently organize diverse safety education activities for our employees on account of great importance to the safety production as well as create a safer environment.

We obtained Safety Standard III Certification in 2015.

Our safety policy has been adopted based on international safety practices along with full compliance to all local and national policies.

All employees receive mandatory training before beginning employment and attend weekly “tool box” training sessions conducted by a full time Safety Manager.

Full PPE must be worn at all times by all employees and visitors prior to entering the shop.

SHIPPING

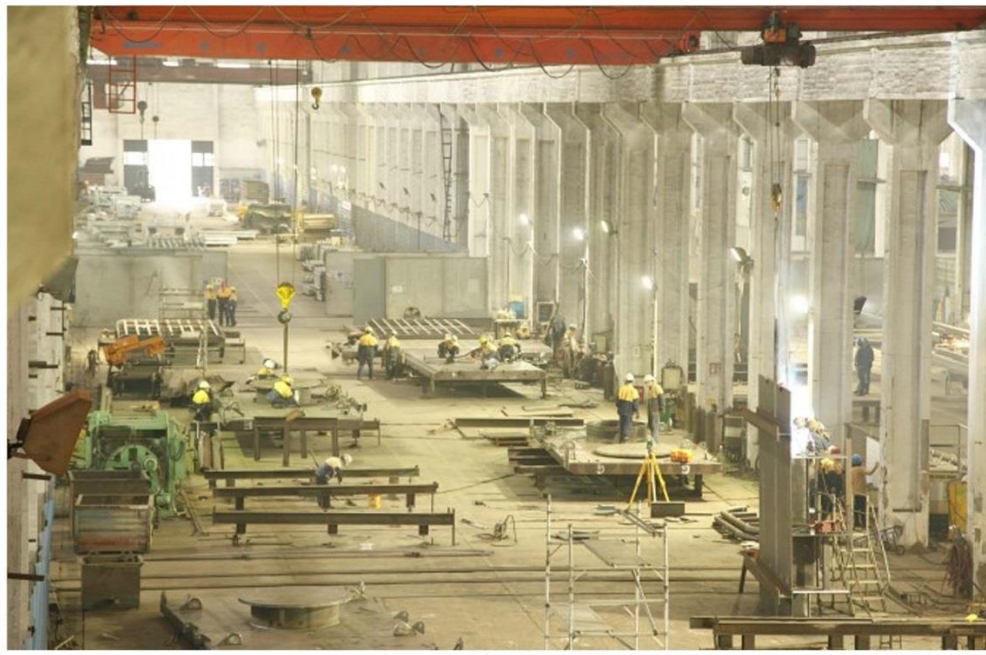

Our shop is located less than 2 km from Beilun international deep water port facility. Export packaging and fumigation is in compliance with international quarantine regulations. Modular and over size assembly shipping services available for Break Bulk transportation.

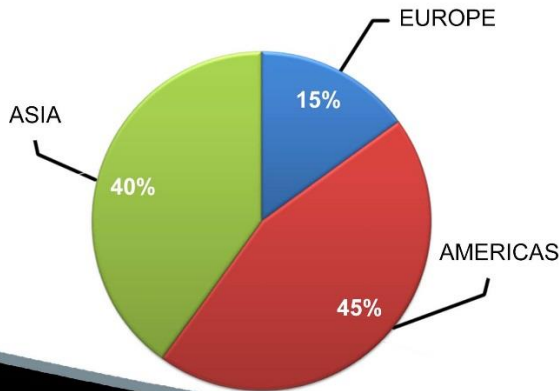

NSS FABRICATION FACILITIES

Ningbo China, NSS has fabrication facilities exceeding 33,000 square metres.
